COMPRESSOR HARNESS ADAPTER

IMPORTANT: Unplug your appliance and turn off power at the breaker before servicing. If you have doubts or are unfamiliar with this type of installation work, seek the services of a qualified Service Technician. Supplying Demand assumes no responsibility for the improper installation of this product.

This part is to be used on units which possess a machine harness mating to a compressor using discreet electrical components or an older combo device being replaced by a compressor with start package electrical type components requiring a Molex type connector.

INSTALLATION INSTRUCTIONS

1. Locate the harness adapter, butt connectors and heat shrink tubing that is included in the compressor kit.
2. Cut the existing connectors off of the unit's compressor wires and install the butt terminals provided.
3. Locate the harness adapter provided with the compressor kit and slip the provided heat shrink tubing over the wires of the harness adapter prior to installing.
4. Insert the wires of the harness adapter into the butt connectors and crimp with tool. **NOTE:** On 115v units, the red and blue wires of the unit should match the red and blue wires of the harness adapter.
5. Connect the Molex connector to the compressor controller making sure the tab snaps into place.
6. Install the controller on the compressor making sure that the compressor clip is in place.
